H.E.S
HANDLING EQUIPMENT SALES LTD.

Driver Training Courses

Many companies overlook training when it comes to pedestrian stackers and powered pallet trucks. However a one day training course can give your workforce the confidence and know how to handle this range of equipment competently and safely.

Handling Equipment Sales Ltd can offer training courses at your site by an ITSSAR accredited trainer, as recognized by the HSE.

These training courses take place in the environment that your employee will be working in.

Course Content

Introduction

**Safety code
Safety checks
Charging
Practical**
